**Tsaker Chemical Group Limited**  
**彩客化學集團有限公司 \***

*(Incorporated in the Cayman Islands with limited liability)*

**(Stock Code: 1986)**

**VOLUNTARY ANNOUNCEMENT**  
**ASSETS LEASING AGREEMENT**

This announcement is made by Company on a voluntary basis to provide the shareholders and potential investors of the Company with the latest information on the recent development of the businesses of the Group.

**THE ASSETS LEASING AGREEMENT**

The Board is pleased to announce that on 21 December 2016 (after trading hours), Tsaker Chemical Xiajin, a wholly-owned subsidiary of the Company, entered into the Assets Leasing Agreement with Xiajin Zhenhua, pursuant to which Xiajin Zhenhua agreed to lease to Tsaker Chemical Xiajin the Assets in relation to the production of OBA (i.e. (i) OBA for textile printing and dyeing; and (ii) OBA for detergent) for a Term of three years (from 1 January 2017 to 31 December 2019) at a rental fee of RMB4,300,000 (equivalent to approximately HK\$4,831,000) per annum. The Term may be renewed prior to its expiry by either party giving written notice to the other, and on mutually agreed terms.

Pursuant to the Assets Leasing Agreement, if Xiajin Zhenhua intends to transfer all or any part of the Assets to any third party during the Term, Tsaker Chemical Xiajin shall have right of first refusal to acquire such Assets under the same conditions.

**REASONS FOR AND BENEFITS OF ENTERING INTO THE ASSETS LEASING AGREEMENT**

The Group is principally engaged in the production of fine chemicals, including DSD Acid, that function as critical dye, pigment and agricultural chemical intermediates. DSD Acid and other dye intermediates the Group produces are the core dye intermediates, without comparable substitute, for the production of OBA. OBA is commonly used to brighten or whiten paper and textile and also the core ingredient, without any comparable substitutes, for the production of dyes for paper and textile, and fluorescent whitening agents for plastics and consumer goods. OBA is most likely to be found in daily used paper, textile, detergents and cosmetics. Given the wide range of application of OBA, the Directors are of the view that by entering into the Assets Leasing Agreement, the Group would be able to expand its businesses to the production of OBA, being the downstream application of DSD Acid, which would in turn expand the product range and diversify the income streams of the Group, as well as increasing the Group's market share in the DSD Acid industry.

## **DEFINITIONS**

In this announcement, the following terms shall have the following meanings unless the context otherwise requires:

“Assets”	the assets and facilities in the relation to the production of OBA
